Double-blind studies have repeatedly found that stating the obvious primarily serves to convey something which is already known, recognized, acknowledged or understood. Research has further confirmed that repeating, reiterating, or recapitulating this test result (i.e., that stating the obvious repeats what is already known) only intensifies the uselessness of the message in direct proportion to the number of repetitions, while creating a sense of annoyance, aggravation,

REG

and frustration in test subjects, including those who (out of ignorance, masochism, lack of basic willpower, or some other character defect) allow themselves to read, listen to, or mentally assimilate such pointless and drawn out messages without being able to stop before reaching the very end, conclusion or terminus. Double-blind studies have repeatedly found that stating the obvious primarily serves to convey something which is already known, recognized, acknowl-
